

The Inaugural
STUDENT PAPERS MEETING

26th March 2008

CALL FOR PAPERS

This one-day meeting provides an opportunity for students to present their research to an audience of other students and experienced researchers. The intention of the meeting is to allow students to gain experience of the paper submission and presentation process in a formal, but less hostile, environment than conferences and journals may be able to provide.

The student must be the first author of the paper and that the work must have been predominantly carried out by the student. The work, however, need not be mature nor complete: papers that report work-in-progress are entirely acceptable. Submissions are encouraged in any area of computer vision.

Submission and selection of papers

Full papers, formatted according to the BMVC guidelines and of no more than six pages in length, should be submitted as PDF by email to t.cootes@manchester.ac.uk and must arrive no later than 17:00 on 22nd February 2008.

Submitted papers will be refereed by the meeting's co-chairs and may be accepted for oral or poster presentation. Authors will be informed of the result of the reviewing process within three weeks of the closing date for submissions. Detailed information regarding the duration of oral presentations, the size of posters etc will be given to authors when notified of acceptance.

Prize papers

At the end of the meeting, prizes will be awarded for the best oral and poster papers. The criteria used to reach a decision include the perceived quality of the work, the paper itself, and the oral or poster presentation.
